How to Access Cal-PASS Plus

If you do not have an account on Cal-PASS Plus, you will need to request access on behalf of your institution. Cal-PASS Plus will verify your identity with the primary program contact on your college prior to providing access in order to preserve the security of institutional data. This may take a few days. To request access, visit www.calpassplus.org and select “Log-in” in the upper right corner of the web page. Complete the “New Users” request by providing your name, email, phone, organization, and title. Make sure to add a comment in the box called “Special Request” that says “Requesting Foster Youth Report.” This will alert Cal-PASS Plus that you want to see that data specifically.

To expedite verification, use your institution email and contact phone number to complete this form. If you would prefer not to have a unique log on, or to speed up the process, you may work directly with your Institutional Research department to have a person with an existing account access the information more quickly.

Foster Youth Data Access and Quality

All California Community Colleges (CCC), participate in Cal-PASS Plus. The CCC community has recently developed a new data flag in their MIS data system to support the identification and tracking of foster youth. Consistent use of this flag is necessary to ensure accurate data reporting. If foster youth have not been flagged consistently, current and historical information regarding this population at an institution may be inaccurate in the Cal-PASS Plus system of data.

How to Access the Foster Youth Report

How to View the Foster Youth Dashboard (Community Colleges Only)

1. Go to www.calpassplus.org, log in, and then select the appropriate tab for “Community Colleges” or “Universities” in the center of the web page.
2. Then select “Helpful Reports” from the drop down menu.
3. From here, you will be able to select the related “Foster Youth” report.
4. Select the parameters you want using the buttons at the top of the dashboard, then hit “Refresh” to run the report on the foster youth population at your institution.
5. You may then view the data through the dashboard or export the data to a spreadsheet for internal use, or to share with partners.

For questions or support in accessing data on Cal-PASS Plus, contact help@calpass.org.
